Author

Network modeling - HS2021

Length of the report: please do not exceed 2,500 words.

Submission: Submit the report using Moodle. The report should be submitted along with the R script as an R or an Rmd file. If you use an Rmd file to write the report, please attach the corresponding pdf file. The deadline for submission is January, 14th at noon.

1 Introduction

Provide a brief description of the data, research questions/hypotheses and aim of the analysis.

2 Data analysis

2.1 Model

Argue for the model you chose. Report a short description of the model (model equation, assumptions, aim) and its specification (formula) for the analyzed data.

2.2 Analysis

Perform the analysis (estimation, validation and results) and comment on the different steps. You can use subsections to distinguish among them.

3 Conclusion

Summarize your findings and discuss the issues that you might have encountered.
